Given our existing workload, and the perspective that the proposed corrective action work at the landfill is more than adequate to remove wastes illegally disposed of under federal PCB rules, I don't see any reason to participate in another conference call.

I still think we need to make a final civil enforcement decision regarding placement of >50 ppm soils in the landfill. I'd rather spend time on the enforcement question than additional time on cleanup issues that ADEC seems well equipped to manage.

Dave

Dave:

Do you want to participate in another conference call with ADEC on the Port Heiden site ?

This one will be on the Port Heiden Updated and Revised Corrective Action Proposal. As I understand we wanted to be kept in the loop but that there was no active role for the TSCA PCB program.

Thanks,

Subject: Port Heiden Updated and Revised Corrective Action Proposal

---

Lori/Louis,

Please find attached the Updated and revised proposed corrective action approach for the work out at Port Heiden. Weston believes that this proposed corrective action plan will meet the needs of the ADEC and the requirements of the landfill permit. We also believe this will meet the needs of the Village and is consistent with TSCA Regulations. I would like to allow time for your review on this proposed corrective action approach, and would like to ask that we have a conference call later this week (possibly Friday) to discuss and possibly finalized this approach.

We are available if you have questions and/or comments prior to having a conference call later this week.

Thank you
